Accredited Continuing Education

ONLINE PROGRAM

Medical-Surgical Nursing Standards of Practice and Certification Review

LEARNING OUTCOME:

Participants will be able to identify current standards of Medical-Surgical nursing practice and apply them to selected patient conditions.

OBJECTIVES:

Upon completion of this workshop, participants will be able to:

- Describe the techniques for preparing for the medical-surgical review exam.
- Relate the pathophysiologic basis of fluid and electrolytes, and assessments of pre and post-operative patients.
- Discuss the nursing assessment and interventions related to selected disorders within the gastrointestinal system.
- Discuss the nursing assessment and interventions related to selected disorders within the respiratory system.
- Identify the appropriate nursing assessments and interventions related to selected disorders within the Hematologic/Immune system.
- Recognize the appropriate nursing assessments and interventions related to selected disorders within the Cardiovascular system.
- Discuss the appropriate nursing assessments and interventions related to selected disorders within the Endocrine system, to include diabetes.
- Apply the appropriate nursing assessments and interventions related to selected disorders within the Renal/genitourinary system.
- Recognize the appropriate nursing assessments and interventions related to selected disorders within the musculoskeletal system.
- Discuss the appropriate nursing assessments and interventions related to selected disorders within the neurological system.
