Artificial Intelligence (AI) in Nursing Practice and Nursing Education

Participants of this program will be eligible to receive
19 CH / 1.9 IACET CEUs.

Conference Registration Fee: \$350

PRESENTERS:

Dr. Karen Broomes-James, DNP, RN, NPD-BC, CCRN-K, SCRN, PCCN,
Director of NYSNA's Nursing Education and Practice Department

LEARNER OUTCOME: At the conclusion of this program, the licensed healthcare practitioner will be able to identify current and potential roles for Artificial Intelligence (AI) in nursing care, adopt strategies to successfully integrate AI in nursing while delivering safe and ethical care and navigate the increasingly technology-driven healthcare environment.

OBJECTIVES:

- Define Artificial Intelligence (AI)
- Explore the historical context of AI in healthcare
- Recognize the current role of AI in nursing and healthcare
- Appraise potential roles for AI in nursing and healthcare
- Examine ethical issues surrounding the implementation of AI in nursing and healthcare
- Review how the use of AI impacts the Nurse Practice Act and nursing practice
- Discuss the legal implications of AI use in healthcare and nursing
- Review the social implications of AI use in patient care settings
- Analyze nursing workforce implications of AI in healthcare
- Examine the current and future use of AI in nursing education
- Formulate strategies to protect nursing practice in the era of AI

PURPOSE STATEMENT:

Artificial intelligence (AI) is quickly changing the landscape of nursing and impacting the future for healthcare providers, patients and their loved ones.

As the healthcare industry scrambles to keep up with recent changes in technology, nurses must prepare for a time when AI technologies will be utilized to meet the evolving needs of patients in many healthcare settings. The use of AI technologies in healthcare began with the introduction of theoretical concepts in the 1950s but has expanded to include practical applications to diagnosis and care delivery. AI has the potential to enhance nursing, but the healthcare industry must be careful to avoid over-reliance on technological shortcuts that threaten safe staffing and appropriate patient care. The successful integration of AI in nursing will depend on ongoing education, appropriate safeguards, and a commitment to maintaining the compassionate, patient-centered approach that defines the profession.

To receive CHs/CEUs, all participants are required to attend all face-to-face sessions of the program, complete all in-session program assignments, complete an evaluation form, and develop an action plan to help achieve accountability at the bedside.
