

Heart Failure Nursing Standards of Practice and Certification Review

LEARNING OUTCOME:

The participant will be able to identify current standards of Heart Failure Nursing Practice and apply them to selected patient conditions.

OBJECTIVES:

Participants will be able to:

- Discuss the component parts of the nursing assessment of a patient in impending heart failure.
- Identify the component parts and the nurse's role in developing the plan of care for a patient with suspected heart failure.
- Discuss the component parts and the nurse's role in implementing a plan of care related to the pharmacologic treatment for a patient with suspected heart failure.
- Discuss the component parts and the nurse's role in implementing a plan of care related to the non-pharmacologic treatment for a patient with suspected heart failure.
- Discuss the appropriate focused screening components for the nurse to utilize with heart failure patients.
- Identify the nurse's role in evaluation of the effectiveness of patient therapies in patients with heart failure.
- Describe professional issues related to nurses caring for patients with heart failure.

FACULTY:

Patricia Ann Watts Kelley, PhD, RN, FNP-BC, GNP-BC, FAANP, FAAN brings extensive experience in the care of the patient living with heart failure across the continuum of care. Dr. Kelley is the Director of the Veteran to Bachelors in Science Program in the School of Nursing at Duquesne University.

Note: The instructor for this program is contracted through Quality Training Solution Corporation (QTSC).
