

Oncology Nursing Standards of Practice and Certification Review

LEARNING OUTCOME:

The participant will be able to identify current standards of Oncology nursing practice and apply them to selected patient conditions.

OBJECTIVES:

Upon completion of this workshop, participants will be able to:

- Describe the techniques needed to prepare for the Oncology Nursing Certification Examination.
- Discuss the concepts of the health promotion, epidemiology, prevention, and current screening methodology in certain cancers and early detection of cancer.
- Identify the scientific basis for oncology disease and practices.
- Discuss current treatment modalities and their specific roles in cancer prevention and treatment.
- Discuss the etiology of symptoms experienced by oncology patients and the nursing management.
- Discuss the psychosocial dimension of nursing care of the oncology patient.
- Identify selected oncologic emergencies, including care and treatment of each.
- Discuss the concept of survivorship for those living with cancer.
- Discuss key concepts related to palliative and end-of-life care.
- Describe the role that oncology professional organizations can plan in emphasizing professional expectations, standards and quality of nursing care for the oncology patient.
